[The importance of local mountain guides](#)

This video is the result of our collaboration with AIGAE, the Italian Association of Environmental Trekking Guides. We wanted to highlight the importance and value of local certified guides: they are indeed the guardians of the territories and a key of knowledge for people coming to visit from outside. The Sentiero Italia is an immense heritage, still unknown to many, and professional guides can be a way to educate and connect people with it.

[TEDx / To go living in the mountains](#)

Just after the end of the expedition in autumn 2021, Va' Sentiero was invited to hold a speech at TEDx Parma. We therefore reflected on the topic of going to live in the mountains, and Yuri Basilicò – founder of the project and president of the Association, brought a thoughtful speech on the stage. The video has been selected by the international jury for being broadcasted on its main Youtube channel.
